Office Acti n Summary

The election of species requirement over estrogen antagonists/agonists is withdrawn.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 11, 12, 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over EL Rashidy in view of Halonen et al.

EL-Rashidy teaches sildenafil in the treatment of sexual dysfunction (abstract). Optimization of clitoral response in females^e is disclosed (column 3 lines 18-20).

Halonen et al teach (Deaminohydroxy) Toremifene for the treatment of vaginal dryness or sexual dysfunction in women after menopause (abstract).

^{dy}
[^] It would have been obvious to one of ordinary skill to add (Deminohydroxy) torefimine to the composition of EL-Rashidy to achieve the beneficial effect of additionally treating vaginal dryness in view of Halonen et al.^l

Claims 1, 11, 12, 40 are rejected.

Claims 2,-5, 41-43 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
